Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is responsive to the amendment filed 04-23-2007, which has been entered. Claims 2-24 are currently pending.

Specification

1. The specification is objected to as failing to provide proper antecedent basis for "an optical axis", "an optical train", "an optical part" and a movable device" set forth in claims 2, 11 and 17 the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claims 2-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 2, it is unclear as to what axis is the optical axis referring too. There is no description for "the optical axis" in the specification. In addition it is not clear as to what part is the optical part and the movable part is referring to. There is no description of an optical part and a movable part in the specification. It is not clear as to what is "an optical train". It should be noted that a pulley being rotatable on an axis is not a movable device but rotational device. If the pulley is actually shifting radially or axially such that it changes position, then it can be a movable device. There must be a translation.

In claim 17, line 5, "said movable device lacks antecedent basis. In

addition, is not clear as to what is a remote motor. It is also not clear if the term "remote motor" is referring to a motor that is remote from an object or is a particular type of motor.

The preamble of claims 11 and 17 is unclear because the preambles refers to a method but does not disclose what the method is for. Therefore, preamble must be updated to include what the method is for.

Allowable Subject Matter

4. Claims 2-24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
